VERGE VALET — CITY OF VINCENT

Staff Guide

How Vincent residents book on Verco, and how council staff look up, help and report on those bookings from the admin app.

Version 1.1 · 20 October 2026
For City of Vincent customer-service and waste staff — Verco go-live edition.
Prepared by D&M Waste Management.

5. First-week notes

Revision log

What this guide is

From **Monday 24 August 2026** City of Vincent's Verge Valet bookings run on **Verco** — the same platform Mosman Park, Cottesloe and Peppermint Grove moved to on 29 June. The old Softr/Airtable booking app is closed to new Vincent bookings from that morning; every existing Vincent booking from 1 July, and every survey response since August 2025, has been carried across so nothing is lost.

This guide is for **City of Vincent staff** who take resident calls, help residents book, or report on the service. It has two parts:

- **Part A** — what a Vincent resident sees when they book, so you can walk a caller through it.
- **Part B** — the admin app: finding a booking, helping a resident pay or cancel, exceptions, strata buildings, service tickets, reports and surveys.

Your login is **scoped to City of Vincent** — you see Vincent bookings, notices, tickets and surveys, and nothing from the other member councils. WMRC head-office staff see all councils; D&M staff see everything and handle field operations.

Operating model is unchanged. You view and support; booking changes that affect pricing or capacity (date moves, service changes, refunds) continue to route through **WMRC** (`vergevalet@wmrc.wa.gov.au`) with D&M support, exactly as before. Where this guide shows a button you *can* press, it also says when you *should* hand off instead.

1. Vincent at a glance

Resident booking site	`https://vvtest.verco.au` (the Verge Valet site — residents pick *City of Vincent* or start typing a Vincent address)
Admin app	`https://vvtest.verco.au/admin`
Collection days	**Tuesday and Thursday**, 60 bulk collections per day
Included allocation per property, per financial year	**2 collections** — Bulk Waste up to 2, Green Waste up to 1 (a Green collection counts as one of the 2)
Extra (paid) collections	Bulk Waste **$195.45** · Green Waste **$114.55** — paid by card at the time of booking
Services	Bulk Waste, Green Waste (no mattress service for Vincent)
Place-out window	Items on the verge no earlier than **72 hours** before collection day
Booking / cancellation cut-off	**3:00pm the day before** collection (what residents are told; the system accepts changes until 3:30pm as a grace window)
Booking references	New bookings: `VIN-` + 6 characters (e.g. `VIN-K7Q2RM`). Bookings carried over from the old system keep their old reference (e.g. `VIN-B-59803`). Both work in search.
Eligible properties	17,881 — every Vincent address from the old system, plus 97 strata buildings (MUDs)
Help for residents	WMRC Verge Valet team — `vergevalet@wmrc.wa.gov.au`

The financial-year allocation counter is correct from day one. Every Vincent booking since 1 July 2026 was imported, so a resident who used one collection in July on the old system sees *"1 of 2 used"* on Verco — they don't get a fresh allocation because the system changed.

2. Part A — What a resident sees

You won't usually book for residents (they self-serve), but most calls are "I'm stuck at step X". This is the flow, step by step.

2.1 Address

The resident opens `vvtest.verco.au`, clicks **Book a Collection**, and starts typing their address. Google suggestions appear after a few characters; they pick theirs.

- **Eligible address** → a green *"Property found"* banner and an allocation tile: *"Collection — 1 of 2 included used, 1 remaining"*.
- **Not eligible** → a red *"This address is not eligible"* message. Usually the address is outside Vincent, or it's a brand-new property not yet on the list. Take the address and raise a **Service Ticket** (§3.7) — D&M can add a property in minutes.
- **Strata building** → a purple *"contact your strata manager"* banner. Strata collections are booked by staff on the building's behalf (§3.6), never by individual residents.

2.2 Services

The resident chooses **Bulk Waste** and/or **Green Waste** and a quantity. The tile shows what's included and what's paid: anything beyond the 2 included collections is priced live (**$195.45** bulk / **$114.55** green). Nothing is charged until the final step.

2.3 Date

A calendar shows the next **Tuesdays and Thursdays** with spaces remaining. Full days are greyed out. The first bookable day is always at least two days ahead — same-day and next-day bookings aren't possible.

2.4 Location and notes

Front Verge, **Side Verge** or **Driveway**, plus an optional note for the crew (*"items beside the carport"*). Notes go straight to the collection crew's run sheet.

2.5 Contact, verification, terms, payment

1. Name, mobile and email. A mobile or landline with the wrong number of digits is rejected on the spot — *"Check your number. Mobiles are 10 digits (04xx xxx xxx); landlines need the area code (08 xxxx xxxx)."* — and the resident re-enters it (all 10 digits for a mobile, a landline with its area code, or a 1300/1800 number in full) before they can continue. The same rule applies when you change a number on a booking's CONTACT panel or on a strata contact.
2. A **6-digit code** is emailed; the resident types it in. No passwords, no app.
3. They tick the **terms and conditions**.
4. **Free booking** → confirmed immediately. **Paid extras** → a card payment screen (Stripe); the booking confirms the moment payment succeeds.

A **confirmation email and SMS** arrive straight away with the reference and a link to view, change or cancel the booking. A **reminder** goes out 3 days before collection.

2.6 After booking

From the link in their email the resident can **change services or date** (up to the cut-off) or **cancel** (up to 3:00pm the day before). After collection they get a short **feedback survey** — the results feed the Reports page you'll use (§3.9).

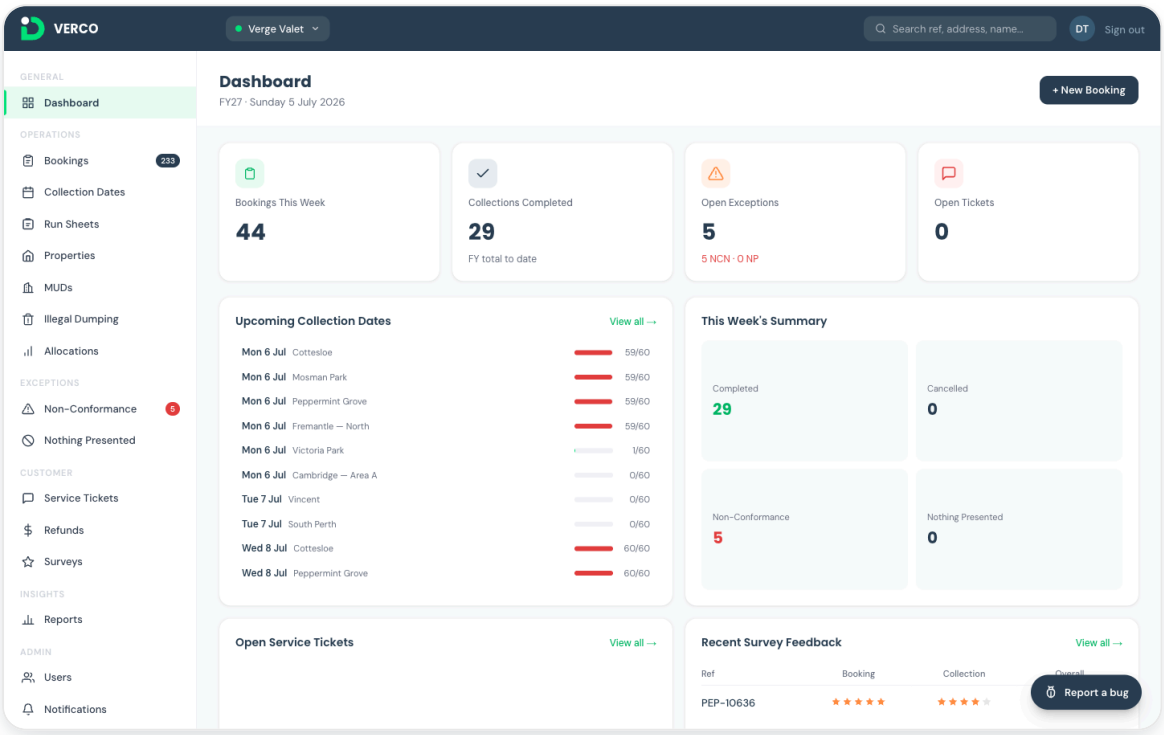

Common call: "I never got the code." Ask them to check junk mail, and to confirm the email they typed. The code expires after a few minutes — they can request a new one. If it still fails, raise a Service Ticket.

3. Part B — The admin app

3.1 Sign in and find your way around

URL: `https://vvtest.verco.au/admin`

Sign in with your **council email address** — the same 6-digit code flow residents use. There is no password. If you're not sure your account exists yet, ask WMRC; accounts are created by WMRC or D&M and scoped to Vincent.

The admin dashboard — headline stat cards, upcoming collection dates and the grouped sidebar.

Top bar: the Verco logo (home), a **global search box** (reference, address or resident name — the fastest way to a booking), and your initials (account menu).

Sidebar:

Section	Pages	You'll use it for
OPERATIONS	Bookings, Collection Dates, Properties, MUDs, Illegal Dumping	Day-to-day lookups (§3.2–3.6)
EXCEPTIONS	Non-Conformance, Nothing Presented	Disputed collections (§3.5)
CUSTOMER	Service Tickets, Refunds, Surveys	Your queue (§3.7), feedback (§3.10)
INSIGHTS	Reports	Monthly figures (§3.9)
ADMIN	Users, Audit Log	Rarely — WMRC manages users

Some pages (Run Sheets, Clients, Notification Templates) are D&M-only and don't appear for you.

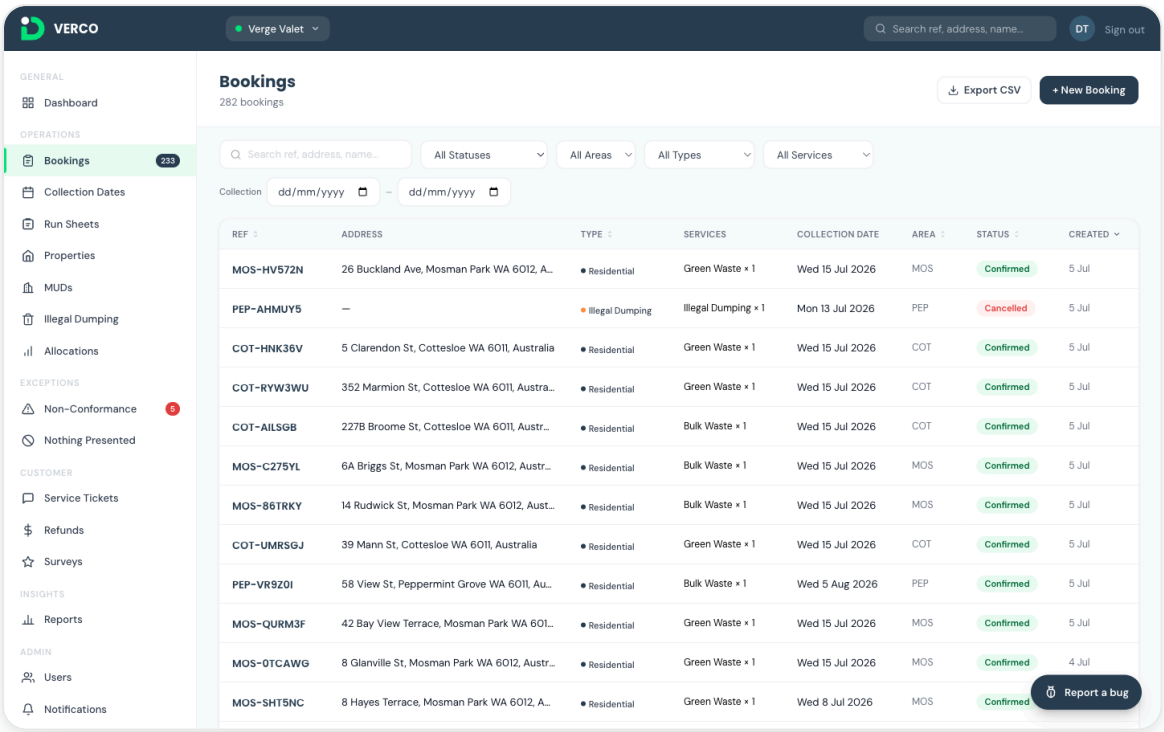

Dashboard cards: *Bookings This Week* (confirmed, next 7 days) · *Collections Completed* (financial year to date) · *Open Exceptions* (NCN + Nothing Presented awaiting action) · *Open Tickets*. Below them: the next Vincent collection days with a capacity bar (`47/60`), this week's bookings by status, and the latest survey feedback.

You only see Vincent. Your account is narrowed to the City of Vincent sub-client. The area filter on every list still appears but only `VIN` rows come back. If a resident quotes a reference that isn't `VIN-…` , they've booked under another council's address — hand to WMRC.

Bottom-right "Report a bug" button — for the app misbehaving (a button does nothing, a value is wrong). It goes to D&M's developers. Resident requests go in **Service Tickets** instead.

3.2 Looking up a booking

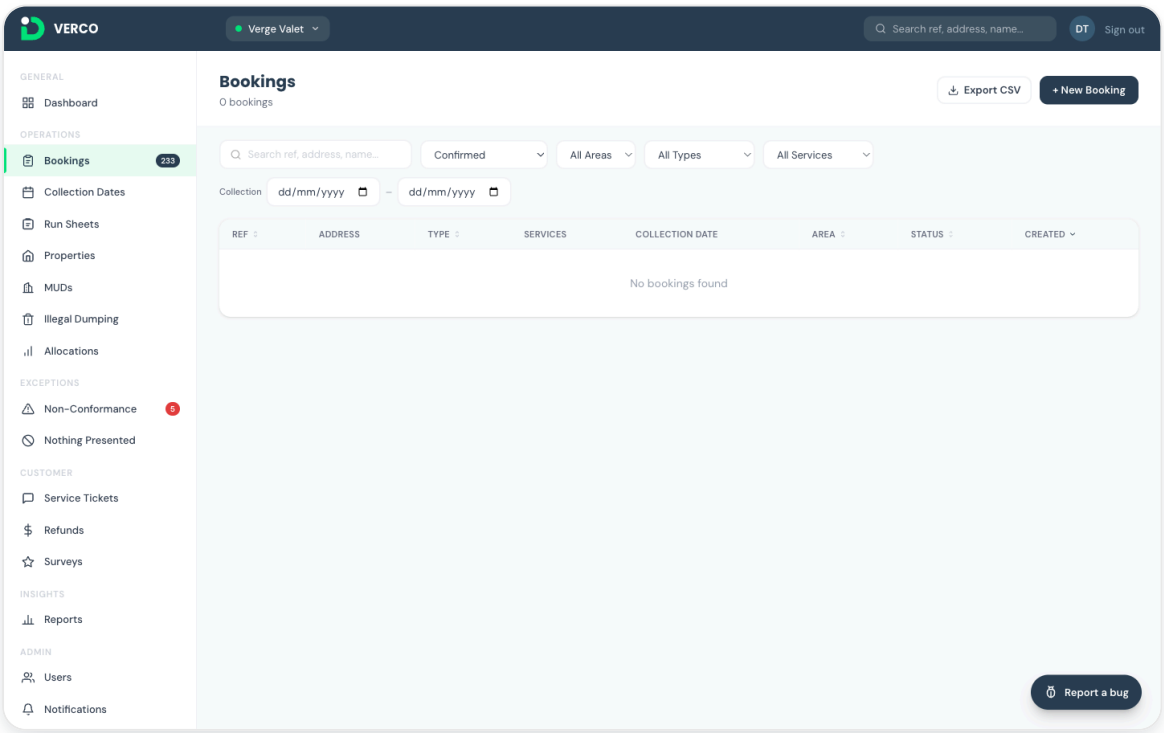

URL: `https://vvtest.verco.au/admin/bookings`

The bookings list — searchable, filterable by status, type, service and collection-date range, with sortable columns.

Fastest path: paste the reference into the top-right global search. Otherwise click **Bookings** and type the **address**, **surname** or **email** into the search box — the list narrows as you type.

Filters: status · type (Residential / MUD / Illegal Dumping) · service · collection-date range. Click a column header to sort. *"Showing X of Y"* updates live. **Export CSV** (top right) downloads whatever is on screen.

The bookings list with a status filter applied.

Status badges:

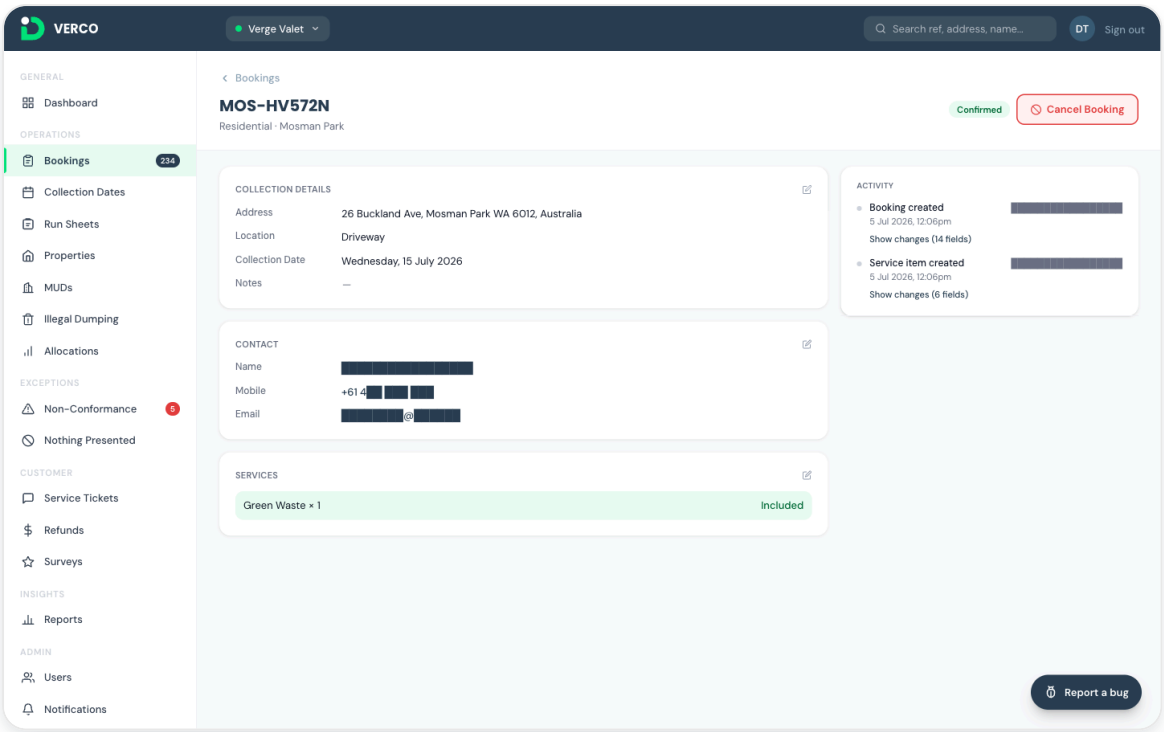

Badge	Meaning
Confirmed	Locked in for that date
Scheduled	On tomorrow's run — flipped automatically at 3:25pm the day before
Completed	Collected
Pending Payment	Booking exists but the card payment wasn't finished. A green **Pay** pill reopens the payment page.
Cancelled	No longer active
Non-conformance	Crew attended but couldn't collect as booked — see §3.5
Nothing Presented	Crew attended, nothing on the verge
Rebooked	A follow-up booking was created after an exception

Can't find it? Reset the status filter to *All Statuses*; check the collection-date range isn't set; ask whether they signed up with a different email — email is the identity anchor, and a typo at sign-up creates an account they can't see.

Bookings carried over from the old system show their old reference (`VIN-B-…`), the original date, location and notes, and the correct status (Completed, Confirmed, Non-conformance). Their "Activity" timeline starts at the import on 23 August — earlier history is in the old system only.

3.3 Reading a booking

Click any row to open the booking's page (`/admin/bookings/<id>`). You can copy the URL to a colleague.

A Confirmed booking — Collection Details, Contact, Services and the Activity timeline. (Contact fields are redacted in this image only.)

- **Header** — reference, status badge, *"Residential · City of Vincent"*.
- **COLLECTION DETAILS** — address, verge location (for a strata booking, the building's waste-location notes — §3.6), collection date, crew notes.
- **CONTACT** — name, mobile, email. A name ending **(Admin)** means staff made the booking on the resident's behalf; the resident may not remember it.
- **SERVICES** — each line marked **Included** (from the allocation) or a **$ amount** (paid extra), with a total.
- **ACTIVITY** — every change, oldest first, with who made it. This is how you settle *"I never added Green Waste"* — check when the line was added and by whom.

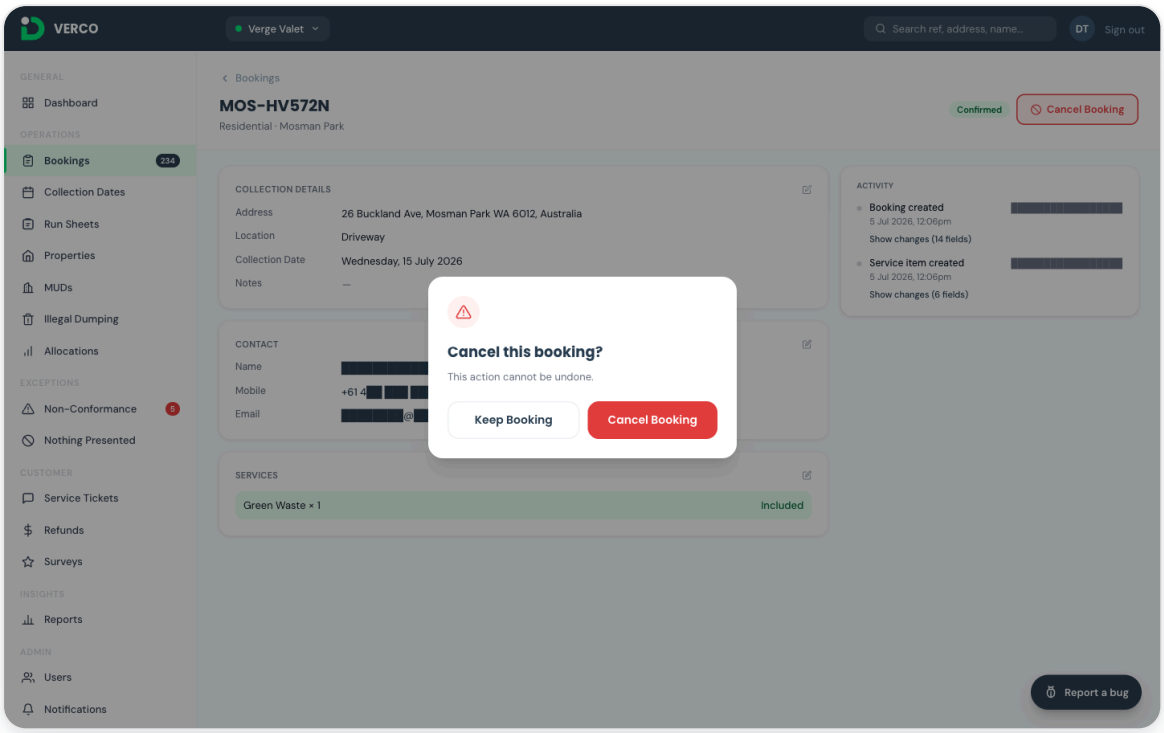

Buttons at the bottom depend on status: *Pending Payment* → **Pay Now** / **Cancel**; *Confirmed* → **Cancel** (until 3:30pm the day before); *Completed / Cancelled / Non-conformance* → none (raise a new booking instead).

3.4 Helping a resident — pay, change, cancel

Pay a Pending Payment booking. Open the booking → **Pay Now** → the card page opens. Either the resident pays there with you, or read them the payment link. Confirmation happens within seconds of payment.

Change the date or services. Prefer this over cancel-and-rebook: open the booking → pencil icon on COLLECTION DETAILS or SERVICES → the wizard reopens with the same reference; the change is audit-trailed and no refund is triggered. *Policy:* date and service changes for Vincent are actioned by **WMRC** — take the details and pass them on unless you've been asked to do these yourself.

Cancel (before 3:30pm the day prior). Open the booking → **Cancel Booking** → confirm.

The cancellation confirmation dialog.

After cancelling: status becomes **Cancelled**, the resident is emailed, and — if they paid for extras — a **Refund Request** is raised for approval (§3.5f). Refunds are never automatic.

Cancelling after the cut-off. Staff can, but the crew is already dispatched. Only do it for a genuine operational reason, and write the reason in the booking notes first — the audit trail records *who*, the notes record *why*.

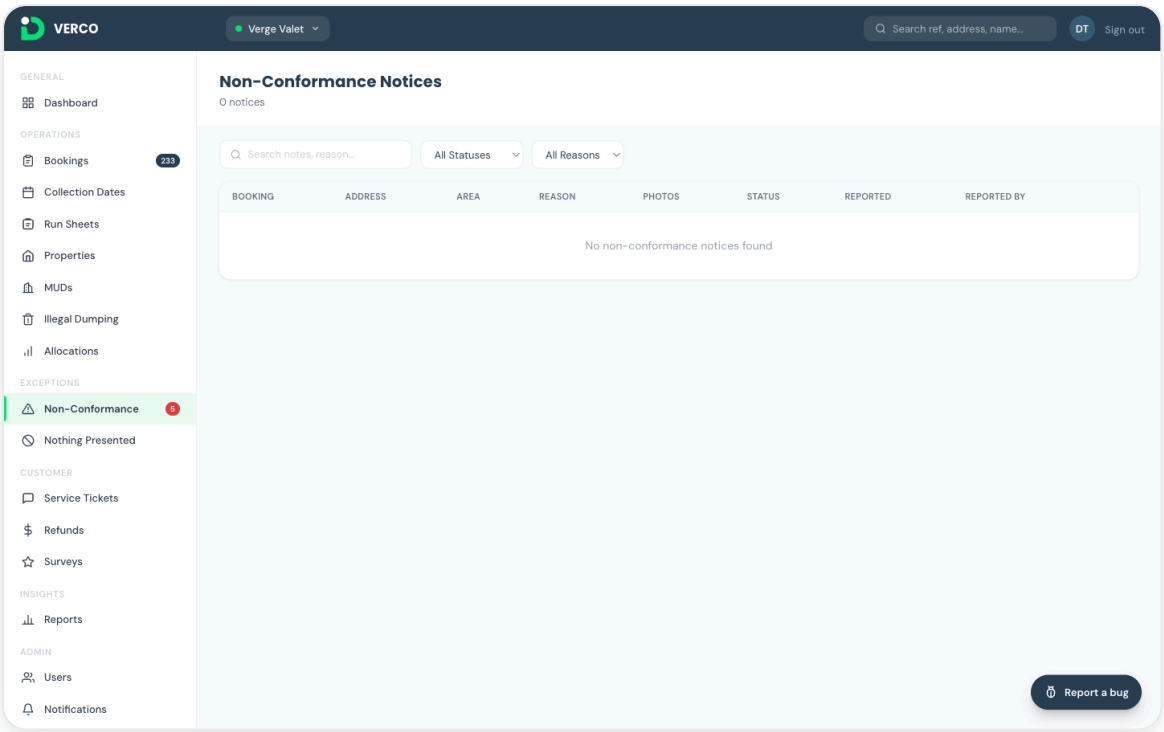

3.5 Exceptions — non-conformance, nothing presented, refunds

When the crew can't collect as booked they record one of two notices from the truck:

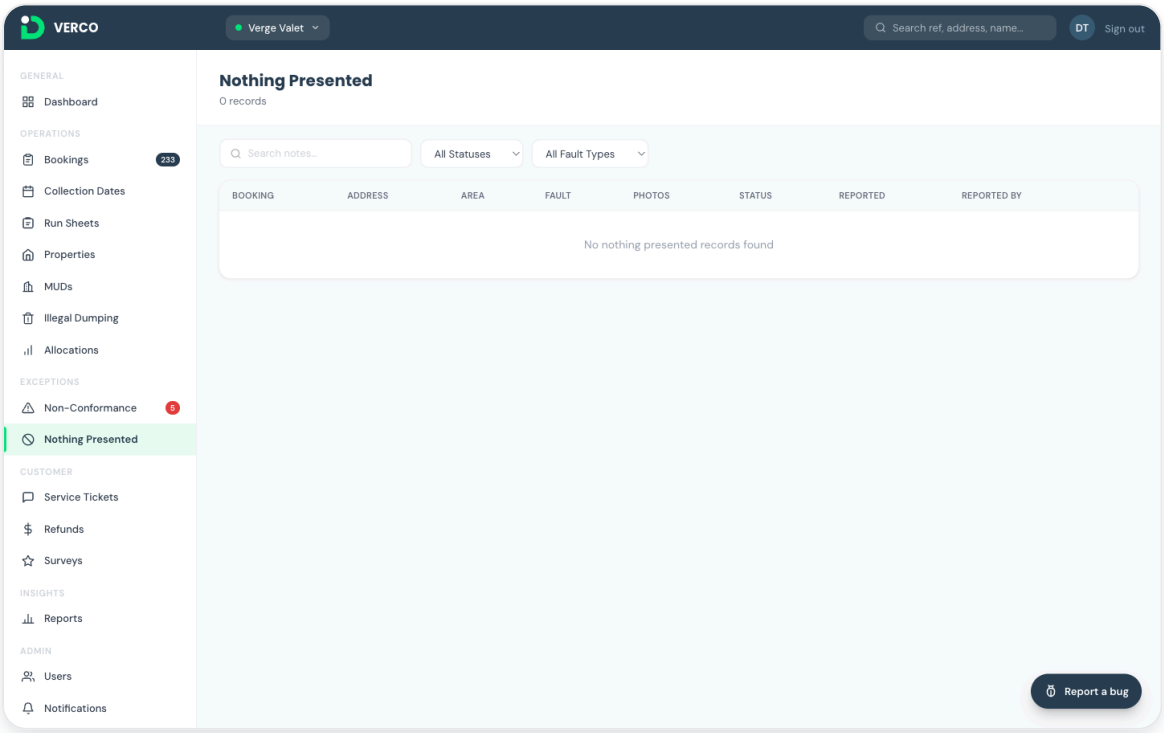

- **Non-conformance (NCN)** — items breach the rules (oversized, contaminated, wrong spot). Photos attached.
- **Nothing Presented (NP)** — nothing was on the verge.

The resident is emailed and has **14 days to dispute**. If they don't, the notice closes itself. If they do, it lands in your queue.

a) Lists. `/admin/non-conformance` and `/admin/nothing-presented` — filter by status (Issued / Disputed / Under Review / Resolved / Rescheduled / Closed) and, for NCNs, by reason.

The Non-Conformance list.

The Nothing Presented list.

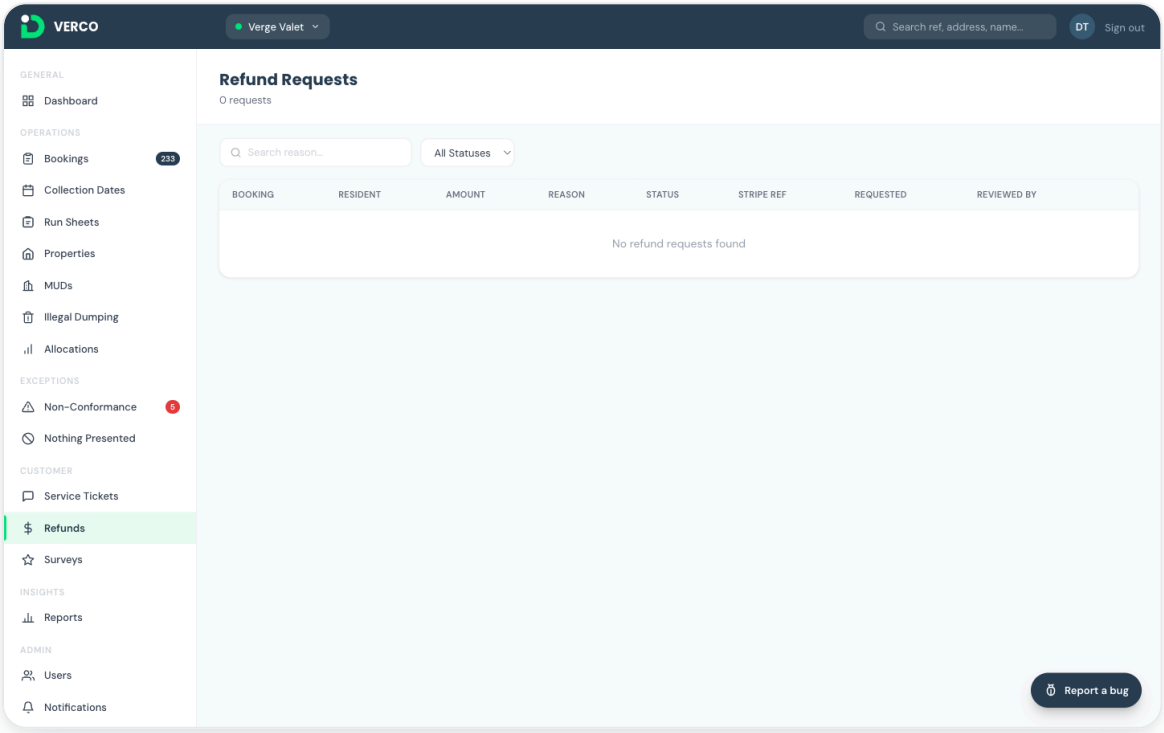

b) What you can act on. Only **Disputed** notices. An *Issued* notice is still in the resident's 14-day window.

c) Triage a dispute. Open the notice → read the crew's note and photos → read the resident's dispute → decide:

Finding	Action
Crew was right (photos show oversized/contaminated items)	**Under Review → Resolved**, with a note the resident will see
Resident was right	**Resolved** with an apology note; D&M reviews the crew call
Genuinely unclear	**Rescheduled** (new date, same booking) or **Rebooked** (fresh booking). Both email the resident automatically.

Policy: Vincent staff can triage, but where the outcome is a free re-collection or a refund, loop in WMRC first.

d) Refund requests. `/admin/refunds`.

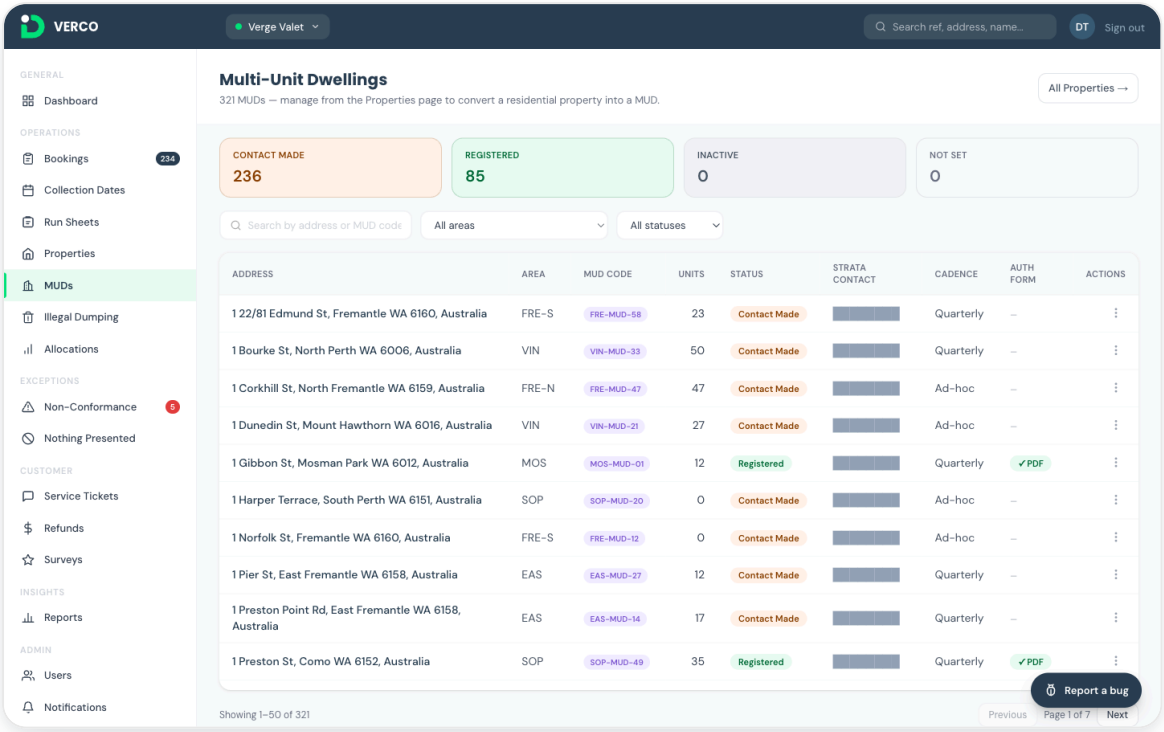

The Refunds queue.

Every refund needs a person to approve it. They come from cancellations of paid bookings and from exception resolutions. Open the request → check the amount matches what was paid → **Approve** (the card refund is issued automatically, 1–3 business days) or **Reject** with a reason the resident is emailed. **Refund approval is a D&M/WMRC step** — you'll see the queue, but leave approvals to them unless agreed otherwise.

3.6 Strata buildings (MUDs)

URL: `https://vvtest.verco.au/admin/muds`

Vincent has **97** multi-unit dwellings on the list. Residents in these buildings can't book for themselves — a **strata manager** arranges collections for the whole building, and a staff member books on their behalf.

The MUDs list — status cards, addresses, unit counts, cadence and the Auth-form column. (Contact column redacted in this image only.)

A building is bookable only once it is **Registered**: signed authorisation form on file, a strata contact (name, email, phone), and **waste-location notes** — where the building's bins or pile will be. Since 20 October 2026 crews see those notes on their run sheet and in the route plan for every booking at the building, so keep them current and keep names and phone numbers out of them. *Contact Made* and *Not Set* buildings can't be booked yet — WMRC is working through those with the strata managers.

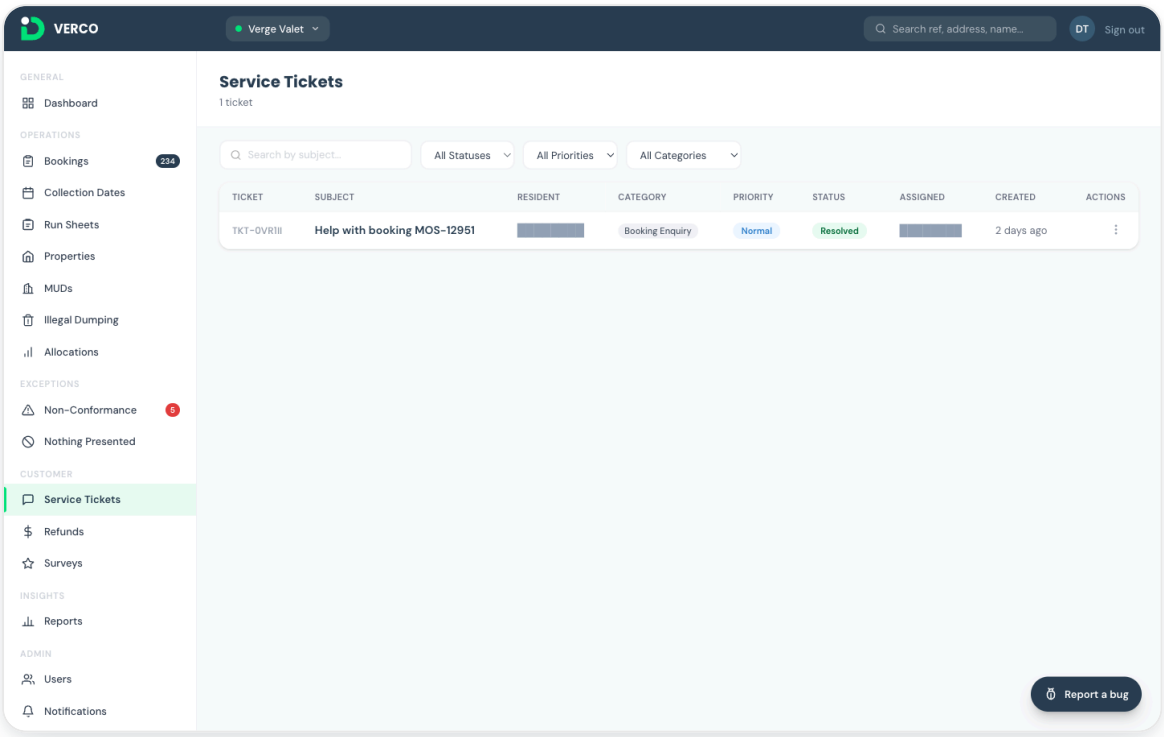

To book for a Registered building: open it from the list → **Create booking** → the form opens with the address, type *MUD*, the strata contact and the **waste location** (the building's notes) pre-filled and read-only — there is no location to pick; if the crew should look elsewhere, update the notes on the building first → services, date, an optional note for the crew → **Create MUD booking**. It confirms immediately (no code step). The allocation is the building's **unit count × 2**, shared across Bulk and Green.

Resident in a strata building phones you: take their details, confirm which building, and refer them to their strata manager (or WMRC if the building isn't Registered yet). Don't try to book a single unit through the resident flow — the system will refuse.

The strata contact details are visible to you and WMRC only — never to crews, and never to other residents. Don't include the contact column in anything you share. Crews see the address, the services, the waste-location notes and any booking note — nothing else.

3.7 Service tickets — your queue

URL: `https://vvtest.verco.au/admin/service-tickets`

The Service Tickets queue. (Names redacted in this image only.)

Anything a resident needs that isn't a button on their booking: *"my address isn't recognised"*, *"I didn't get the code"*, *"I need to change my email"*, *"I need an invoice"*.

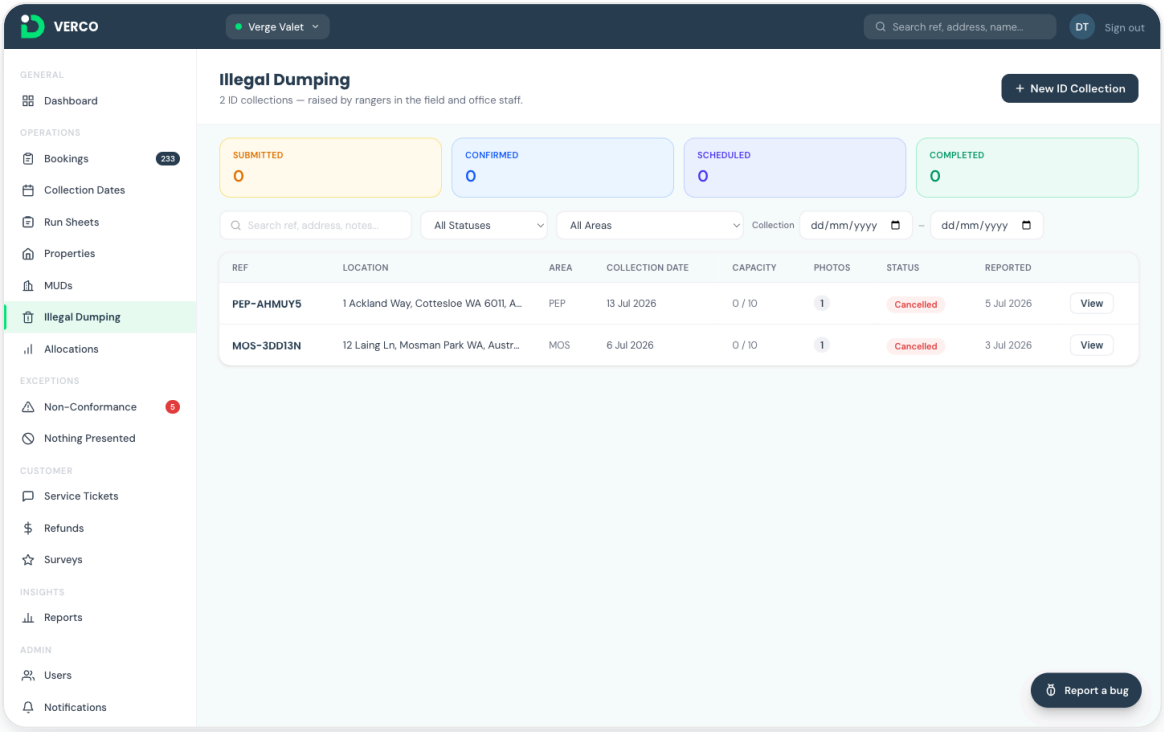

1. Filter to **New**, unassigned.
2. Open the highest priority → read the message and any linked booking.
3. **Assign** yourself so nobody double-handles it.
4. **Reply** in the thread — the resident is emailed your reply. If that email doesn't send, an amber banner under the reply box says so with a **Resend email** link: click it once (it reads *Resending…* until done). If the resident has no email on file, the banner says that instead — phone them. A resend never double-sends: if the first email did go out, the resend is skipped. (**Retry** on the Admin → Notifications page has the same guard — a message that already went out, or is sending now, is refused with a plain note, not an error.)
5. Set **Awaiting Resident** if you're waiting on them, **Resolved** when done, **Closed** after they confirm (or after a week of silence).

Tickets you can't action (a property to add, a refund, a crew query) — assign to WMRC or D&M with a note. That's the hand-off mechanism; you don't need to email separately.

3.8 Illegal dumping

URL: `https://vvtest.verco.au/admin/illegal-dumping`

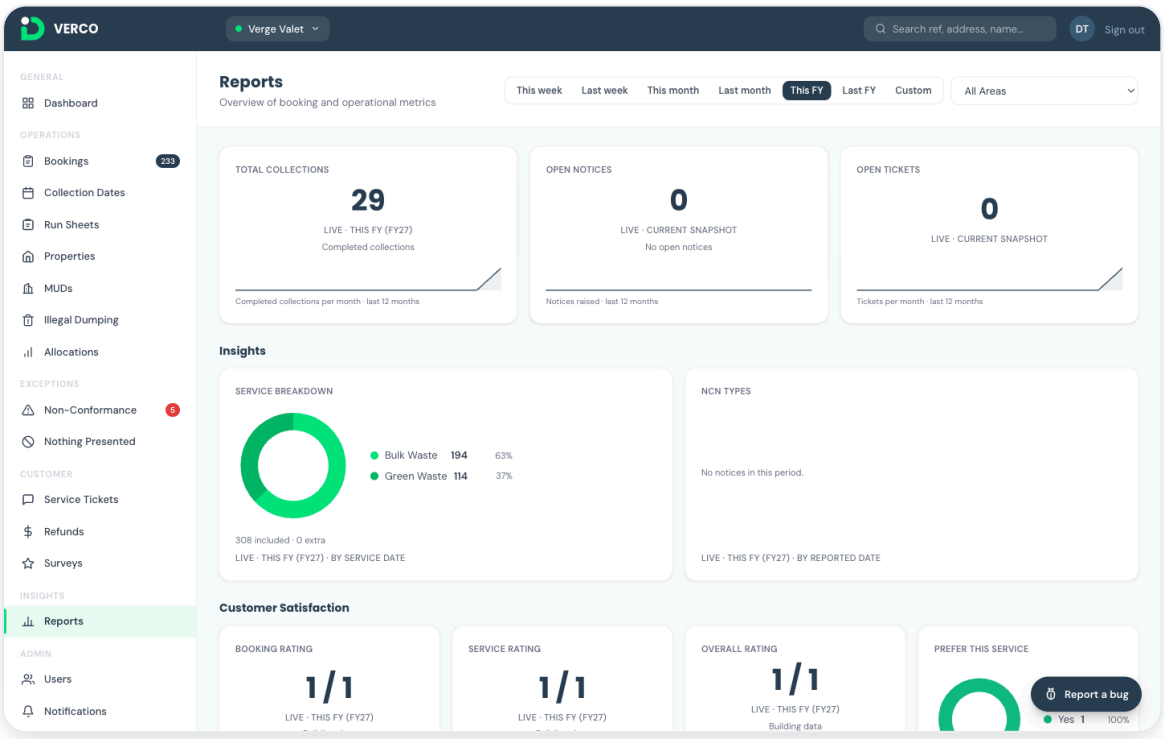

Dumped waste with no booking. Rangers raise these from the field app; office staff can log one here with **New ID Collection** — address, waste type, estimated volume, a photo, and a collection date. The volume is a guide for the crew; what's actually collected at closeout.

The Illegal Dumping list.

3.9 Reports

URL: `https://vvtest.verco.au/admin/reports`

The Reports dashboard — headline numbers, service and NCN breakdowns, customer-satisfaction cards, and the SLA grid with 12-month sparklines.

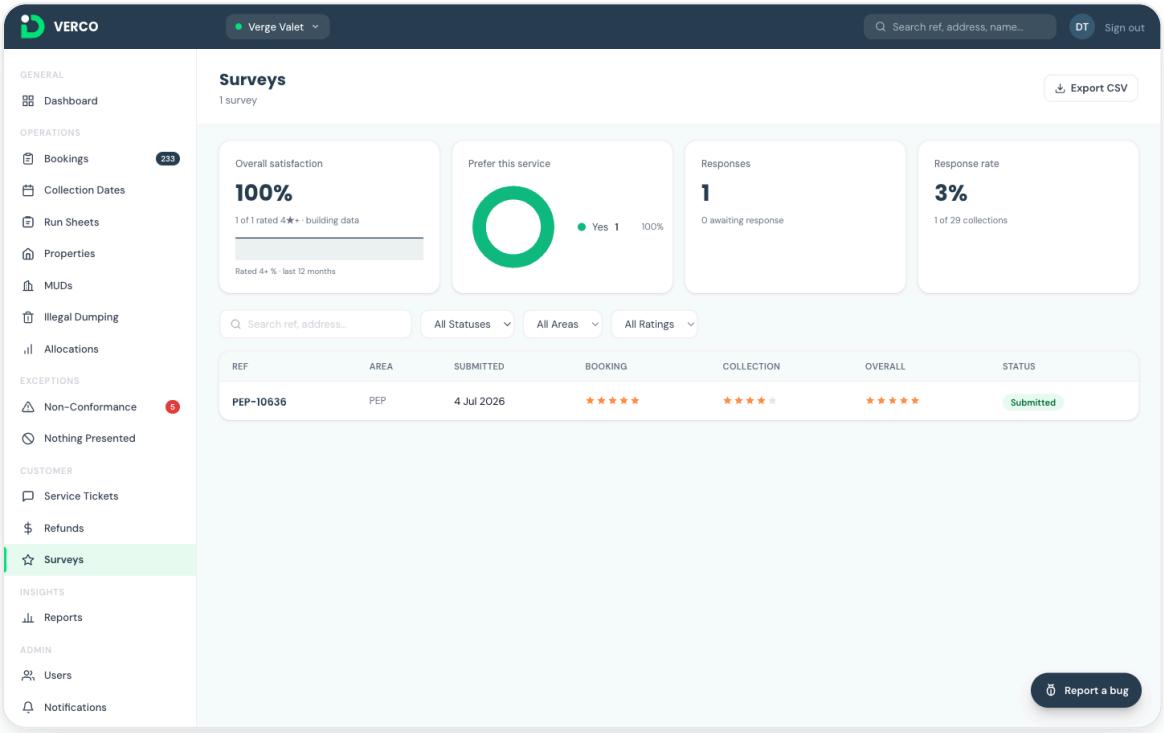

Your monthly numbers, live and filtered to Vincent:

1. **Headline** — total collections, open notices, open tickets.
2. **Insights** — Bulk vs Green split; why collections were non-conformant.
3. **Customer satisfaction** — booking, service and overall ratings plus the *"Do you prefer this service?"* split, from resident surveys. **Vincent's history runs from August 2025**, so the trend is meaningful from day one.
4. **Service level** — on-time collection, rectification within 2 days, ticket first-response and resolution, property penetration — each with target and a 12-month sparkline. A couple of D&M-operational cards are hidden from council logins by design.

Use the **period selector** on each card for the month you're reporting on.

3.10 Surveys

URL: `https://vvtest.verco.au/admin/surveys`

The Surveys list with the summary panel.

Every completed collection triggers a short survey. Responses list here newest first; click one for the resident's answers; **Export CSV** for your own analysis. Responses imported from the old system are marked **Airtable** and show the old booking reference. The **response rate** counts Verco-era collections only.

No action needed — this is a listening tool, and it feeds the Reports page.

---

4. Quick reference — who does what

Situation	You	WMRC	D&M
Resident can't find their booking	Search, explain status	—	—
Resident wants to pay	**Pay Now** with them on the phone	—	—
Date or service change	Take details	**Actions it**	—
Cancel before cut-off	Can do, or pass to WMRC	Actions it	—
Cancel after cut-off	Pass on — reason required	Decides	Crew impact
Address not recognised / new property	Service Ticket	—	**Adds property**
Disputed non-conformance	Read + triage	Confirms outcome	Crew review
Refund	Don't approve	**Approves**	Approves
Strata booking	Refer to strata manager	**Books on behalf**	Books on behalf
App looks broken	**Report a bug** button	—	Fixes
Something to collect with no booking	Log an ID collection	—	Crew

5. First-week notes

- **Two reference formats** will coexist for a few weeks: `VIN-B-…` (carried over) and `VIN-…` (new). Search handles both.
- **The old booking site is closed to Vincent** from Monday 24 August. If a resident says they booked "on the old site" after that, ask for the reference — if it doesn't exist in Verco, raise a ticket immediately so D&M can check.
- **Capacity shows real numbers.** Tuesday 25 and Thursday 27 August were already full from old-system bookings; residents will see the next available Tuesday/Thursday.
- **Reminder SMS and emails** go out automatically; residents who booked on the old system get them from Verco now.
- Anything odd in the first week — a booking that doesn't look right, a resident who insists they were told something different — send it to `vergevalet@wmrc.wa.gov.au` with the reference, and D&M will trace it in the audit log.

Revision log

- **1.1 — 20 October 2026.** Updated for the 20 October release: a mobile or landline with the wrong number of digits is rejected at the contact step, with the exact message (§2.5); a strata booking's waste location is the building's notes, read-only on the booking form, and crews now see those notes on the run sheet and in the route plan (§3.3, §3.6); a ticket reply whose email doesn't send shows a **Resend email** banner (§3.7). Button names corrected to the live app (**Create booking**, **Create MUD booking**). Screenshots unchanged.
- **1.0 — 24 August 2026.** Vincent go-live edition. Derived from the Verge Valet User Guide v1.4 (Part C) with Vincent's service rules, collection days, pricing, history import and hand-off model. Screenshots are from the shared Verge Valet admin app (a Vincent login sees the same screens narrowed to `VIN`).
